

AV

## Perth Arena

A multi-purpose entertainment venue, Perth Arena is designed to accommodate a wide range of events from international tennis matches and basketball games to major concerts.

Hewshott was engaged by Venues West to undertake peer review of the AV design and provide strategic advice on the extensive digital signage system that was required.

Subsequently, we were engaged to provide project management and consultancy for the delivery of all of the clients AV and IT requirements during an extensive 6 month period.

The venue pushes the envelope of digital signage technology with over 100 screens throughout the venue that can be configured in many different ways. Dominating the foyer is a 'pendant', a spectacular 88-screen double-sided video wall, a complex concept delivered with attention to detail and care.

As the projects AV consultants and project managers, Hewshott was instrumental in driving the market to respond to the demands of the client to ensure the highest quality result - a world-class digital signage solution for a worldclass venue.
